Why Kids @Churchill Park?

At Kids @Churchill Park, we believe children are naturally curious and want to learn. Our role is to provide a quality learning environment that encourages exploration and independence, one that provides opportunities for children to practice the myriad of emerging skills they acquire in their early years.

Program planning for our child care centres is based on the most current research surrounding early childhood and brain development. We offer rich educational programs that build on the imagination and potential of each child.

At our child care centres, we recognize that each child is an individual who will develop at his or her own pace. We plan open-ended activities that allow children to participate at their level, yet still be challenged and encouraged to engage in new experiences in a safe environment.
